

## *Facilities & Land Use*

# Riverside Campus

The Riverside Campus is a unique and invaluable asset to the broad education, research, service and outreach missions of the Texas A&M University System. It enables the System members to conduct programs that could not otherwise be performed on the main campus or at the Research Park. In areas such as homeland security and protection of U.S. embassies abroad, the activities at Riverside have contributed immensely to A&M's reputation and stature in fields of key national needs.

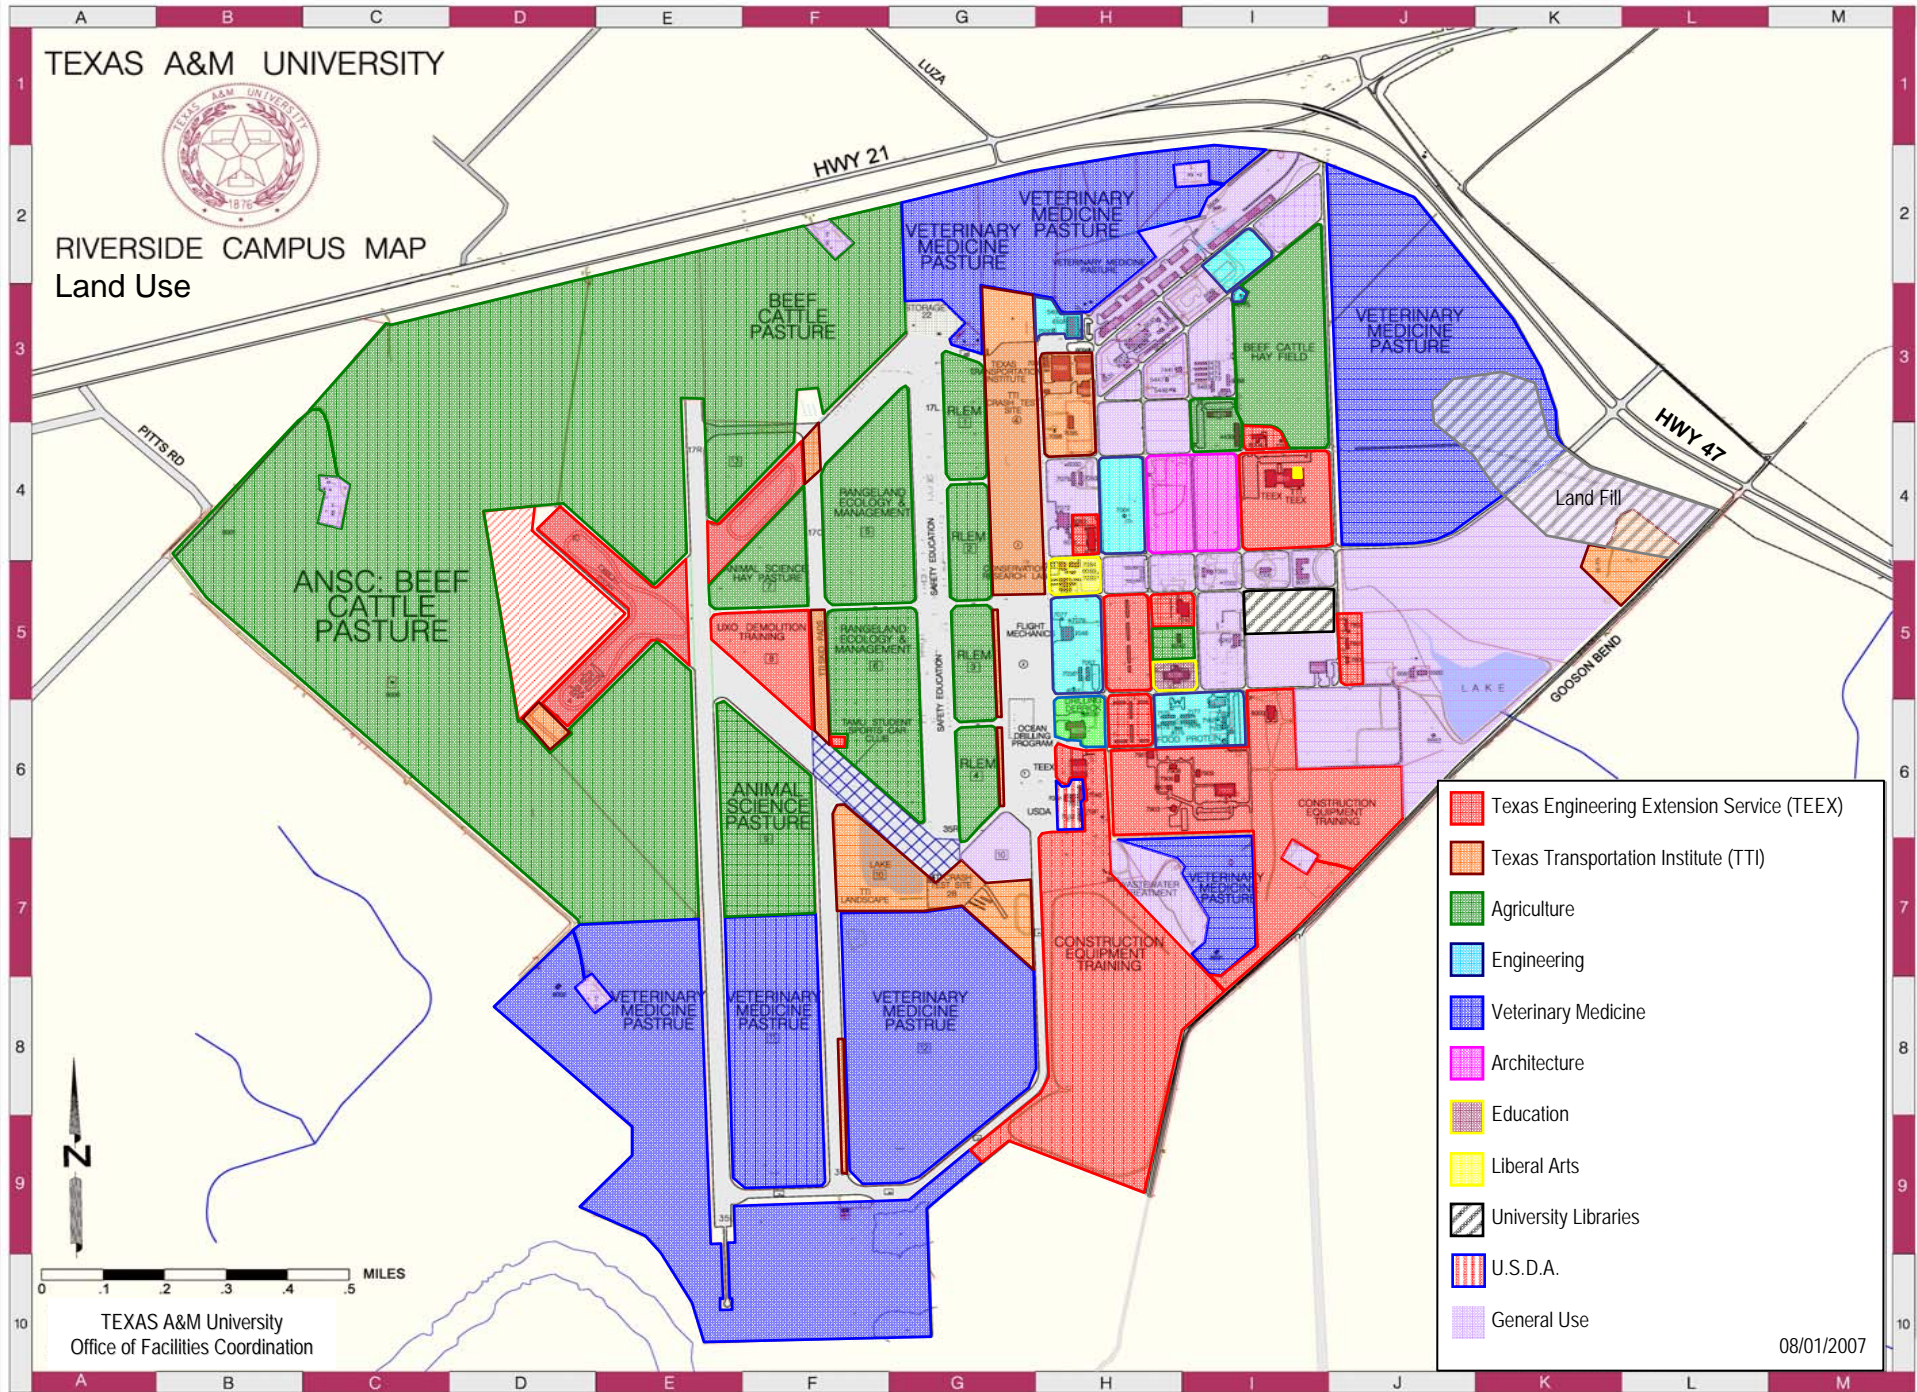

*- Dr. Lee Peddicord, Texas Engineering Experiment Station*
